Insurance Policies & Records

Financial Accounts & Investments

Employment Matters

Debt & Asset Records

Funeral Arrangements

PERSONAL FINANCIAL INVENTORY & PLAN

Congratulations! The book that you are ordering will help you collect, evaluate and organize major financial, insurance, legal and other various matters that affect your life. When completed, this will be your **road map to success and security** for you and for those you love.

Completion of your plan requires a collaborative effort with all of your professional advisors. When finished, this book will **set forth your specific goals, values and objectives**. While specific professionals will assist you with each section by providing their knowledge and expertise, the final responsibility for this project belongs to you.

Recognizing that each individual and family is unique, the binder format was selected to allow each book to be **customized** to the reader's individual needs. Feel free to add or remove sections, or organize the book differently. Space is provided for the storage and organization of important documents. Feel free to write notes in the margins, draw diagrams, or collect news articles that you want to discuss with the appropriate advisor. In addition, a **zip drive** is included with a PDF workbook version allowing you to type your plan and to easily make *changes and updates* in the future.
